

Odoo 18 certified architect with **20+ full-cycle ERP implementations across 12+ countries** and zero failed go-lives. Former Development Team Lead at an Odoo Silver Partner (led 7 developers). I own delivery end-to-end — requirements, architecture, custom development, integrations, go-live — and build AI-powered automation where it measurably pays: WhatsApp self-service at 4,000+ customer scale, document automation, ZATCA compliance at 1,500+ invoices/month.

EXPERIENCE

Independent Odoo Architect & AI Automation Engineer

2026 – Present

Remote · GCC, Europe, Asia-Pacific

- Currently architecting and building an end-to-end Odoo ERP platform for Total Telco Solutions, a New Zealand telecommunications group — under a long-term build contract.
- Direct-to-client implementations, ERP rescues, and automation builds.

Development Team Lead — Synodica Solutions Pvt. Ltd.

Sep 2024 – Jul 2026

Odoo Silver Partner · Surat, India

- Led 7 developers across 4 concurrent ERP projects — architecture, resourcing, delivery, and hiring.
- Raised team productivity ~30% by introducing AI-driven development workflows; cut delivery delays ~25%.
- Reduced post-deployment issues ~30% via code review standards and deployment automation.

Software Engineer → Senior Software Engineer

Sep 2021 – Aug 2024

Synodica Solutions Pvt. Ltd. — joined while completing engineering degree

- Delivered full-cycle Odoo projects across automotive, pharma, facilities, retail, and IT services.
- Revamped a 10,000+ line legacy module — ~30% performance gain, major technical-debt reduction.

SELECTED PROJECTS

Automotive Group ERP — Saudi Arabia

HR, payroll, accounting & sales for 300+ employees; ZATCA Phase 2 at 1,500+ invoices/mo; WooCommerce & WhatsApp integrated. 60% less manual work.

Pharma Manufacturing ERP — India

3 systems consolidated into 1; full MRP with stage-gate QC across 5+ warehouses. 50% fewer production tracking errors.

Maintenance & Subscription Platform — Rwanda

Subscription-driven scheduling for 35+ technicians; WhatsApp self-service for 4,000+ customers replaced ~50% of call-center load.

Hourly Billing Platform — IT Services, United States

Self-allocating hour packages with customer portal; 100% of manual billing eliminated, 45% fewer client queries.
